

Quick-Start: Online & Kiosk

Technical Requirements and Equipment

DecoPac's Cake Ordering website/Kiosk offerings are designed to function on the device of your choice, which gives you the ability to purchase your preferred hardware at the vendor of your choice. Once you have acquired your hardware all that is needed is an internet connection. You are then able to set up and manage your account, along with accepting and managing incoming orders.

Any up-to-date laptop or desktop computer with an internet connection (hard-wire or wifi) can be used to accept Consumer orders and manage your account.

In order to provide the most compatible system in the market, we have designed the The Magic of Cakes Kiosk functionality so that it can be used with any mobile device (e.g., iOS and Droid operating systems).

Quick Start: Online & Kiosk

You must complete the following steps to set up your bakery for *The Magic of Cakes* Online Ordering. For more detailed instructions, refer to the Setup Guide.

What You'll Need:

Setting up your bakery will take approximately 60-90 minutes, depending on how many cake options you offer. If you can't complete your setup at one time, information entered will be saved.

Before you start:

Be sure you have the following information handy when you set up your bakery.

- DecoPac Customer Number
- Email Address associated with your account
- Bakery Standard Hours
- Bakery Holiday Hours
- Cake Flavors
- Cake Sizes
- Cake Prices
- Cake Fillings
- Cake Icings
- Cake Icing Colors
- Upcharge amounts for cake decorations
- Bakery Description: 1-2 sentences about your bakery (optional)
- Bakery Logo in .gif, .jpg, or .png file format (optional)
- Images of any custom (non-DecoPac) cakes in .gif, .jpg, or .png file format
- Date you want to begin accepting online orders
